

VUDRM

MAKING YOUR CONTENT PROTECTION EASY

VUDRM enables you to stay in control of who watches your content and when. Using our flexible token generation, you can dynamically issue individual user permissions for one piece of content, with no need for re-encryption. Device agnostic and with support for Microsoft PlayReady, Google Widevine, FairPlay Streaming & Adobe Primetime, our solutions are trusted by broadcasters globally. Supported by all major video players.

VUALTO

VUDRM FEATURES

> MULTI DRM SUPPORT

Multi-vendor DRM is made simple, with one single workflow to deliver to multiple devices. Supporting Microsoft PlayReady, Google Widevine, FairPlay Streaming and Adobe Primetime.

> VUDRM TOKENS

Unified Streaming also integrating with the likes of Wowza, AWS Elemental, Comcast and Azure.

> CUSTOM STATISTICS

Comes complete with access to detailed statistics, allowing you to create custom reports for analysis to track, monitor and measure your licence counts.

> HOSTED OR INTEGRATED

We provide fully managed cloud based licence servers, on premise managed licence servers and integration with 3rd party licence servers.

> DRM ENCRYPTION KEYS

API driven key provider service to generate keys or integrate with your own key service provider.

> GEO LOCATION SERVICE

Ability to track your users locations and usage of VPN and Tor networks, allowing you to enforce your geolocation restrictions.

VUDRM BENEFITS

- One set of policy parameters that work seamlessly across all DRM vendors and multiple devices, regardless of DRM technology, making it a future proof solution.
- With VUDRM's flexible tokens you only need to encrypt content once. The VUDRM token is delivered to the server as part of the licence request so you can set individual permissions for each user.
- Signed VUDRM tokens used to authenticate requests for licences, are generated on-the-fly to provide greater flexibility.
- Key provision API for generating encryption keys for use in your own workflows.
- Easily integrated with 3rd party entitlement servers such as, Comcast's MPX Video Management System.
- As a trusted DRM provider, we currently deliver an average of 1,500,000 licence requests per day. Our licence servers are deployed in Amazon in a multi-region cluster allowing for high scalability and resilience.
- We offer a free 30 day VUDRM trial after which, if you want to go to a paid service, we can convert with ease, without changes to your configuration.
- We have an in-house NOC team who work 24/7 alongside our Developers, to monitor the VUALTO CONTROL HUB platform and its encompassing products. This enables us to tackle any potential issues as they happen, ensuring stable, consistent and high-quality streaming for your viewers.
